

Assignment 2

All assignments *must* be submitted as a JupyterLab `.ipynb` notebook file via email (aattanasio@unm.edu). Title the file with your name: `Assignment_NAME.ipynb`.

Using what you've learned in the first week of bootcamp, generate a time stamp of the form `13:29:45` (for nearly half past one in the afternoon) for the time that is 63,252 seconds after midnight. Start with this statement:

```
In [ ]: seconds_past_midnight = 63252
```

Hint: The only numeric keys you should need or want to push are `0`, `2` or `3`, and `6`. However, this doesn't exclude operations.

Feel free to create as many code blocks as you feel you need. Comment appropriately to describe what your program does at each step.

```
In [ ]: # NAME_OF_YOUR_SCRIPT.py
```

```
In [ ]:
```

```
In [ ]:
```

```
In [ ]:
```
