

Assignment 8

All assignments *must* be submitted as a JupyterLab `.ipynb` notebook file via email (aattanasio@unm.edu). Title the file with your name: `Assignment_NAME.ipynb`.

Write a program to:

- generate an array of numbers from between two user-defined integers (bonus if the amount of numbers generated is also user-defined)
- sum all these numbers together and output the total
- pull out all the even numbers in the array
- output the mean, median, and standard deviation of all the even numbers
